

OnBase is a single enterprise information platform for managing content, processes and cases. OnBase has transformed thousands of organisations worldwide by empowering them to become more agile, efficient and effective. As you browse the sections below, you'll learn why the single OnBase platform is able to provide an almost unlimited number of solutions across your departments, throughout your enterprise.

## A single enterprise information platform for managing content, processes and cases

Transform your organisation by managing your content, processes and cases on a single platform. Whether you implement a single departmental solution or deploy solutions across your entire enterprise, you will increase productivity, reduce operating costs and minimise risk. Improve your level of service by empowering your employees with the information they need, when they need it.

OnBase provides a single platform on which to build content-enabled applications. With one system to support, maintain and upgrade, you'll realize a low total cost of ownership and minimise IT sprawl.

The OnBase product suite is built on a single database, code base and content repository. The OnBase platform is continually updated to ensure that OnBase stays current with industry trends and technology innovations.
